

# WAT-TUH LAKE

Phippsburg Twp., Sagadahoc Co.  
U.S.G.S. Phippsburg, Me. (7.5')

## Fishes

Largemouth bass  
Yellow perch  
Chain pickerel

Minnows  
Golden shiner  
American eel

## Physical Characteristics

Area - 26 acres

Maximum depth - 12 feet

Temperatures:

Surface - 76°F

8 feet - 71°F

Principal fisheries: Largemouth bass, chain pickerel

Wat-tuh Lake is a small, very weedy pond located west of Route 217 in Phippsburg, and is best suited for warmwater fisheries management. The Department of Inland Fisheries and Wildlife stocked largemouth bass in 1955, and bass continue to provide a good fishery. Yellow perch and shiners are the principal forage for bass and pickerel. Dense concentrations of floating and submergent aquatic vegetation provide excellent habitat for forage and game species, but makes navigation difficult.

Access is restricted to permissive trespass across privately owned property.

Surveyed - September, 1954
